Can you help us decide the big questions that should be answered by research?

The Orthopedic Trauma Society are conducting a James Lind Alliance Priority Setting Partnership. We want to hear from patients, their carers/relatives and all healthcare professionals who are involved in treating patients with complex fractures (see pictures) to prioritise the top 10 research uncertainties.

We are interested in patients who have had:

- Open fractures (broken bone coming through the skin)
- More than one fracture at the same time
- Fractures of the pelvis or acetabulum (hip socket)
- Fractures to a joint of the leg broken into multiple pieces
- More than one fracture at the same time

We need your help:

2. We seek local Champions to drive patient participation. If you have contact with affected patients in any context, please contact christopher.bretherton@ndorms.ox.ac.uk

Or visit https://www.ndorms.ox.ac.uk/complexfractures

Thank you
