

# Help improve the future of those affected by **lung nodules** and **lung cancer**

## Your voice matters!

Share your thoughts and experience and help shape better healthcare technology.  
It could help others in similar situations.

### We'd love to hear from you if...

- You've been affected by lung cancer
- You are a family member/carer of someone affected by lung cancer
- You or they have had lung nodules found on a scan

### What to expect

- **Two online group meetings** (2 hours each)
- **Dates:** 9 October 2025 at 10am & January 2026
- Small group conversations
- Remuneration: £25/hour

### About the CLEARST study

The project is led by researchers at Optellum Ltd, who are developing an AI-based software to assist doctors in diagnosing lung nodules, in collaboration with The Leeds Teaching Hospitals NHS Trust. Funded by the National Institute of Health and Care Research (NIHR) and the Office for Life Sciences (OLS).
