

**Are you a parent
with experience of
neonatal care?**

Or

**Does your child have hearing
loss (*from suspected
antibiotic toxicity*)?**

Join our PALOH-UK Parent Advisory Group!

A new genetic test has now been implemented across fourteen NHS hospitals to predict which babies are at risk of hearing loss due to side effects of antibiotics. The test will use genetic information to enable doctors to prescribe the right type of antibiotic to the right baby at the right time.

PALOH-UK is a research study that is working to evaluate how well this genetic test works and how well it is implemented into routine care. This research study will help decide how the genetic test is used across the UK.

By joining our Parent Advisory Group, you'll:

- Make a difference that will shape clinical care in NICU
- Influence the decision-making in research to meet patient needs
- Get to know other parents who share and understand your experiences

WHAT WE OFFER OUR ADVISORY GROUP:

- Payment in recognition of your time and expertise (£25 an hour)
- Travel expenses for in-person meetings
- Remote working allowance for online meetings (£5)
- Support with childcare costs during meetings
- Dedicated key contact to provide support throughout

Interested in getting involved?

That's great! Use the QR code to complete an expression of interest form by **5.00pm on Wednesday 17th September 2025**.

Email us at paloh-uk@mft.nhs.uk if you have any questions and we'd be happy to help!

We're really looking forward to working with you!
