

Help Shape Research on Pleural Empyema in Children

We are developing a research study on **pleural empyema** (a serious lung infection), and we'd love to hear your views!

We're especially keen to speak with **parents or carers of children or young people who have been treated for pleural empyema in hospital.**

Your experiences and opinions can help us design research that truly reflects what matters to families.

You will be reimbursed for your time in line with national guidance.
